Where are the moose?

Algonquin Park has thousands of moose. The best chance of spotting a moose is along the highway 60 corridor running through Algonquin. The moose are not generally afraid of tourists, and will continue to eat along side the road. (DO NOT APPROACH A MOOSE!) Moose are most frequent through May and June when road salt from the winters roads wash into the neighbouring ditches. Moose consider salt to be a treat, especially when mixed with their greens. In the foliage months, taking a very early hike on the Mizzy Lake Trail also can be rewarding. Moose become rare to see in the winter months. We repeat, DO NOT APPROACH THE MOOSE!!!!
